

Spectrolab Illumination Products Shipments to Go Paperless

At Spectrolab we are constantly looking for ways to improve our environmental footprint. We have been granted certification of our Environmental Management System and are proud to be an ISO14001 company.

In our continued efforts to be as conscious as possible about the impact we have on our environment, we are instituting a new process for the Operation Manuals that we currently provide as printed copies with every Searchlight Shipment. We will now be sending all Manuals, Warranty Documentation and the other pertinent documentation on a CD-ROM instead of as a separate package of printed material. We estimate that this will constitute quite an environmental savings and we hope that You, our valued Customers, can help us to ever be mindful of our environment in moving forward.

The Operation Manual will be in Adobe's Portable Document Format (pdf) and will be downloadable to your computer. Should there ever arise the need for a warranty claim, you will have the documentation available on the CD-ROM and will be able to either fill it out on the computer, or alternately, make a print out and send it in.

Of course, should you wish to have a printed version instead of the electronic format on CD-ROM, we can still facilitate this for you at this time.

For more information, do not hesitate to visit our website <http://ils.spectrolab.com> and you can request more information by either calling 800-936-4888 or emailing us at DL-SYLCustomerservice@west.boeing.com
