

PURCHASE ORDER ATTACHMENT Q-6
Shelf Life and Storage Control

The Seller shall ensure that limited shelf-life materials/parts comply with the specification called out in the purchase order. Label information and placement is per this attachment and supersedes other requirements. Labels must contain the following information:

1. Manufacturer's Name
2. Net weight/volume of contents in container **(Not Required for Tape or EEE parts)**
3. Lot or Batch number
4. Storage temperature if different from ambient
5. Buyer's part number as applicable
6. Warranty expiration date of material

Spectrolab Supplier Quality reserves the right to accept changes to the labeling requirement based on information provided on the Certificate of Conformance and Spectrolab applied labels.

The materials/parts shipped under this attachment will arrive at the Buyer's facility with:

- Manufacturer certified shelf life of 6 months or less from the date of manufacture or shipment
 - Minimum of 75% of the specified shelf-life remaining
- Manufacturer certified shelf life of over 6 months from the date of manufacture or shipment
 - Minimum of 50% of the specified shelf-life remaining

NOTE: Tape or Spooled items **must** have the label (with above required information) attached on the **INSIDE** of the Core or Spool.

Materials, other than tape, must have the label affixed to the unit container (the container that holds the purchased product). If it is impractical to label each unit container, the Seller must request label placement instructions from the Buyer.
