

Q9100

Seller's Quality Management System Requirement

1. Seller's quality system shall be in compliance with AS9100.
2. Acceptable evidence of compliance shall be a current third party certification from a recognized registrar.
3. Buyer, and authorized Government Representatives when a government contract is involved, reserves the right to enter Seller's facilities, and those of Seller's suppliers at every tier that are engaged in work related to the Purchase Order for the purpose of surveillance/inspection of the materials, processes, controls, quality records, inventory, and system related to the materials/services procured under the Purchase Order.
4. Surveillance/Inspection of Seller's facilities, processes and controls shall not constitute acceptance of the materials/supplies/services being procured.
5. Seller shall ensure that requirements in the Buyer's purchasing documents are flowed to their sub-tier suppliers.
6. Buyer's purchasing requirements include, but are not limited to, compliance with applicable sections of the AS9100 Quality management System and any additional characteristics as required.

Documentation Order of Precedence
